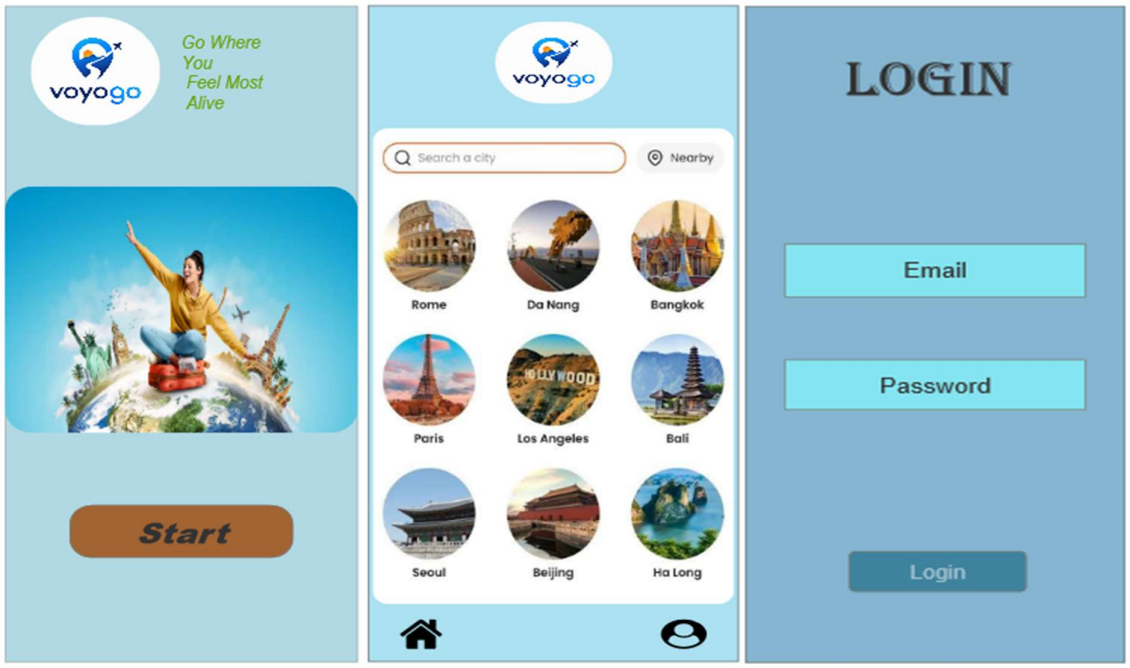
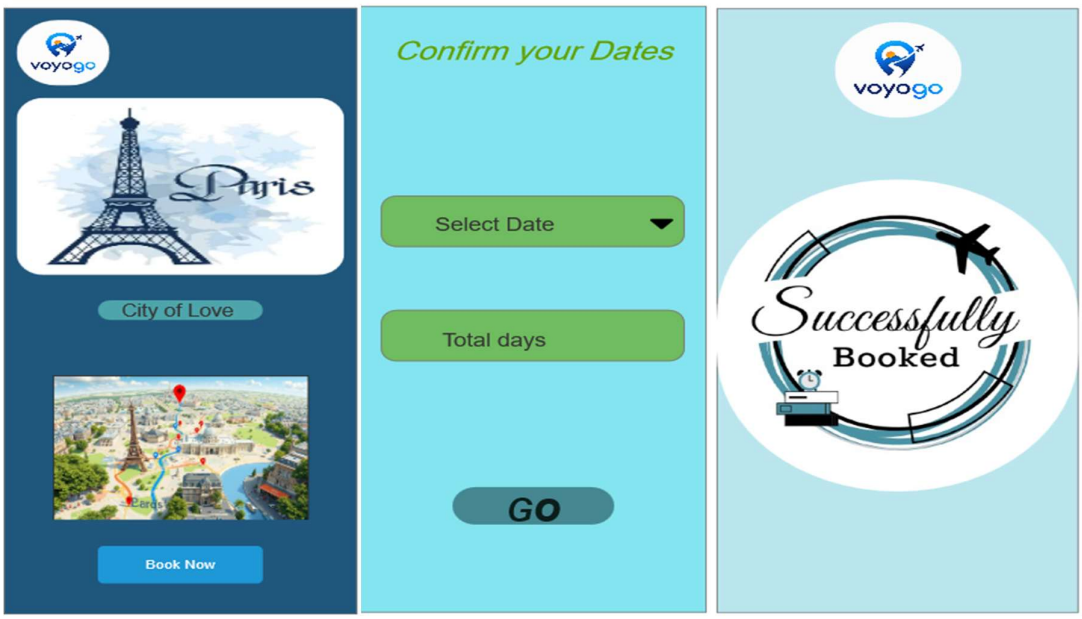
EXPERIMENT – 6

Name: PARAMESWARI P
Roll No: 240701378

Simulate the lifecycle stages for UI design using the RAD model and develop a small interactive interface.





Rapid Application Development (RAD)

The Rapid Application Development (RAD) model emphasizes fast design, prototyping, and user feedback. It is mainly used in UI/UX development where quick iterations and improvements are required.

In this experiment, a travel booking application named “Voyogo” is designed with features like login, destination browsing, booking, and confirmation.

STAGES OF RAD MODEL IN THIS PROJECT

1. Requirements Planning

1. Identify the core features required for a travel app
2. Define user inputs and expected outputs

Features included in Voyogo:

1. User Login (Email & Password)
2. Destination Search & Selection
3. Travel Details View
4. Date Selection & Booking
5. Booking Confirmation Screen

2. User Design

Created UI screens using Axure RP
Focused on simple navigation and attractive layout

Design Highlights:

1. Light blue theme for a calm travel feel
2. Rounded buttons and cards
3. Image-based destination selection
4. Clean typography and spacing

Screens Designed:

Welcome Page (Start screen)
Login Page
Destination Dashboard
Place Details Page (Example: Paris)
Booking Page (Date & Days selection)
Confirmation Page

3. Construction

Added interactions between screens using Axure RP

Functional Interactions:

- Start Button → Login Page
- Login Button → Dashboard
- Destination Click → Details Page
- Book Now → Booking Page
- GO Button → Confirmation Page

Input fields created for:

- Email
- Password
- Date selection
- Total days

4. Cutover (Testing & Feedback)

1. Tested navigation flow between all screens
2. Checked button functionality and UI consistency
3. Improved spacing, alignment, and color balance
4. Ensured smooth user experience

TOOLS USED

Axure RP – UI Design & Prototyping

PROCEDURE

Step 1: Create Pages

Welcome Page

Login Page

Dashboard (Destination Selection)

Details Page (Paris View)

Booking Page

Confirmation Page

Step 2: Design Interface

Added:

Logo (Voyogo branding)

Buttons (Start, Login, Book Now, GO)

Images (travel destinations)

Search bar (city search)

Used:

Soft blue color theme

Rounded UI components

Proper alignment and spacing

Step 3: Add Interactions

Used On Click events in Axure RP

Navigation Flow:

Start → Login

Login → Dashboard

Select City → Details

Book Now → Booking

GO → Confirmation

OUTPUT DESCRIPTION

The designed application includes:

1. Welcome Screen – App introduction with “Start” button
2. Login Screen – Email & Password input
3. Dashboard – List of travel destinations
4. Details Page – Information about selected place (Paris)
5. Booking Page – Date and duration selection
6. Confirmation Screen – “Successfully Booked” message
